About Me

I'm a creative technologist driven by human-centered design and a curiosity for how technology shapes experiences. My work sits at the intersection of design, code, and art, where I craft products, systems, installations, and tools that make design workflows smoother, everyday experiences simpler, and push the boundaries of new-media art.

Experience

Razorpay

Senior Product Designer // Sept. 2025 - July 2026
Product Designer II // Apr. 2024
Product Designer // Jun. 2022
Product Design Intern // Apr. 2022

- Expanded the overall design system by designing, maintaining and building 50+ components, and 3+ patterns *(Used across 75+ products in dashboard, checkout, mobile app, and POS)*
- Built the AI agent 'blade-runner' for faster resolution to consumer asks *(~10 DAU with 94% accuracy)*
- Built "Pattern Creator Figma Plugin" for designer efficiency *(~5 DAU and 70% time saved)*
- Revamped the token structure and components during 2 brand refresh that happened without leading to any breaking change for existing consumers.
- Revamped motion design system and built product motion presets.
- Documented all components and patterns for designer & developer reference.
- Updated the knowledge base of design system for AI agents and improved the MCP accuracy by ~25%.
- Driven evangelisation & adoption of the system throughout the org.
- Led initiatives to open source Blade design system (14k+ downloads)

Algorhythm Lab

Founder & New Media Artist // Oct. 2022 - Current

- Practicing and conducting new media experiments involving different form and mediums - p5.js, Touchdesigner, Data, Projection Mapping, Arduino, etc.
- Work showcased in Razorpay AI Conclave and Vizchitra 2025

Polygon Technology (prev. MATIC Network)

Product + Motion Design Intern // July 2021 - Sept. 2021

- Worked on designing developer friendly crypto products and defining interactions of design system components.
- Designied animation and motion design works that were used in various products and marketing campaigns.

MakeMyTrip

UX Design Intern // Feb. 2021 - July 2021

- Worked with the ingo-UX team in designing enterprise products for hotel line of business by collaborating with other designers & stakeholders.
- Created concept ideas and pitched solutions to identified problems on the platform.

United Nations Development Programme

UX Design Volunteer // July 2020 - Dec. 2020

- Worked with a globally-spread, diverse team of stakeholders in building a better web experience for UNDP's "Mission 1.5" Educational Module.

Education

KTH Royal Institute of Technology, Stockholm

M.S. in Interactive Media Tech. // 2026 -

National Institute of Technology Rourkela

B.Tech in Industrial Design // 2018 - 2022
CGPA // 7.83 / 10.00

Side Project

Mystic Designs // Check here

A newsletter where I document & share products that redefine how tangible interfaces work.

Healthicons // Check here

Volunteered with team of designers to create an open-source set of healthcare icons

Keyscout Plugin // Check here

Figma plugin that fetches key values of components, variables and styles easily.

Tools & Technology

Figma, Claude, Cursor, Webflow, Framer, Adobe Creative Suite, Touchdesigner, Arduino, HTML, CSS, JS (React & p5.js)

Extra-Curricular Activities

Photography

- I explore different forms of photography - travel, abstract, nature, food etc.
- Have 100k+ views & 1000+ downloads every month on Unsplash.

Event Management

- I enjoy cross collaborating & handling various fields to ensure event happens smoothly.
- Organised 2+ events with team at Razorpay with 75-100 attendees in each event.

Evangelisation

- I write & speak about design process and frameworks online.
- Have 500+ views per month on Medium, and have spoken at 10+ events.

Travel

- I travel to explore new cultures, perspectives, and collect stories along the way
- Have travelled to 4 countries and 28+ states & UTs across India.
